PROJECTS

F8 Refresh Hackathon by FACEBOOK
Collaborative Projects to support businesses and communities by using the power of Artificial Intelligence and Augmented Reality. The competition is hosted by Facebook. Built an app incorporating chat-bot (Artificial Intelligence) on Facebook platform - Messenger; which would enable users to book an appointment for the Covid-19 Vaccination.

Gaming Website
Working on a website to include famous 2D games programmed. Learned graphics class and Java Swing package to create window-based applications on Java.

Coding Competitions & Hackathons
Participating in online coding competitions to further improve my programming skills. Collaborating with experienced programmers and work from the ideation to execution of a project.
